News From Clive

Clive Lodge No. 117 I.O.O.F, held installation of officers on Tuesday evening, Jan. 17, D.D.G.M. Bro. T. Wilton and D.D.G.S. Bro. Andrews, of Alix assisted by staff were present to perform the ceremony.

Officers installed were: I.P.G., Jack Harrow; N.G., D. Hoskins; V.G., R. H. Watkins; Rec. Sec., R. N. Longstreet; F.S., W. C. Bachor; Treas., A. Heald; Chap., W. H. Paton; R.S.N.G., D. Spink; L.S. N.G., Frank Baugh; War., Wilfred Kocher; R.S.V.G., A. Hartle; L.S. V.G., W. H. Kocher; R.S.S., S. Moore; L.S.S., S.M. Lindemood.

The third degree was conferred on Bro. Paton at this meeting. At the close of lodge, lunch was served, and a splendid evening was spent.

The Orange Lodge held a supper and social evening on Monday evening, Jan. 23rd. A good time was reported by all in attendance.

We regret very much to learn of the serious illness of Mr. Wm. Gilbert, one of the old timers of Pleasant Valley and we hope for his speedy recovery.

Born.—To Mr. and Mrs. Floyd Cottman, on January 22nd, a daughter.

Mrs. Guest and her son, William, of Rimbey district are visiting with friends at Clive.

The Carnival

Very successful was the Carnival held under the auspices of the Hockey Club on Friday evening. Costumes were varied and excellent, prizes having been won as follows:

Best Ladies' costume, Louise Todd; Best Girl's, Margaret Finlayson; Best Gents, C. Perkins; Best Boy's Tom Carruthers; Best Couple, Mrs. Geo. Doherty and Miss L. Harrington; Comic, W. McCull. Races were won by the following: Ladies open and girls 10 to 12 were won by Doris Danner; Men's open, Bill Robertson; Boy's 10 to 12, Leonard Roberts; Girl's under 10, Isabelle Sneath; Boy's under 10, Charles Reed. A nice crowd enjoyed the skating which followed the judging.

Use "Mac's Best" No. 1 Patent Flour, it is guaranteed. Per 98 lb. Cotton Sack $1.38. W. J. Trott.

Missionary Society

Reports of the year's activities of the Lacombe Presbyterial W.M.S., were presented at an Executive meeting held at the Manse, on Saturday, Jan. 21st. Corresponding Secretary's report showed 31 annual members and 45 life members, a total of 128. Subscribers to the value of $181.29 had been sent to the Bonnyville School Home and 266 lbs. of literature distributed to various centres. A new Mission Band has been organized at Ponoka and a Baby Band at Fairview, and while the Presbyterial allocation is short, the required amount, 54 is felt that much progress has been made. Treasurer's report was received as follows:

Auxiliaries $923.57; Mission Bands $22.57; Baby Bands $2.60; Y.W. Auxiliaries $110.00; Mission Circles $15.00; C.G.I.T. $10.55; Associate Societies $47.39; Expense $85.84. Total amount raised $1217.52. Allocation subscribed $1125.00.

Mrs. R. Hainsworth, of Lacombe and Mrs. W. Mellett, of Wetaskiwin were appointed a committee to bring in a slate of officers to the Conference to be held in Lacombe, on Thursday, March 2nd.

Lincoln News

The annual meeting of the L.C.C. was held at the home of Mrs. Ab. Saunders, when the following officers were elected:—

President, Mrs. R. C. Kinley.
Vice.-Pros. Miss May Morrish.
Sec.-Treas., Mrs. Herb Dool.

A most enjoyable whist drive took place in the hall on Friday night. The lucky winners were: 1st, Gents, Mr. Ladford Frizzell; 1st Ladies, Mrs. H. Kamlah; 2nd Mrs. R. C. Kinley and Ben Benson. Consolation, Mrs. Herb Dool and Ed. Hunt.

The young people are busy practicing a play entitled a "An Old Fashioned Mother," which will be held in the Hall in the near future.

We are sorry to hear that Miss Jean Spink has been confined to the hospital with ear trouble and we hope she will soon recovery.

Mr. and Mrs. McGeachy have returned home after spending a holiday with their son-in-law and daughter, Mr. and Mrs. Tommy Spink.

The School Fair

The annual School Fair meeting will be held in the Town Hall, Lacombe, on Saturday, January 28, at 2 o'clock. Anyone interested in Lacombe School Fair is requested to attend.

Results of School Fair

School winning Educational diploma, Spring Valley.

Scholarships: Girls:—
Sarah Jaffray, Canyon, 110 points.
Margaret Gibson, Mt. Grove, 102 points.
Isobel Magilton, Mt. Grove, 101 points.

Scholarships: Boys:
John Morrison, Mountain Grove, 189 points.
Joe Stout, Spruceville, 124 points.
Chas. Blackmore, Mountain Grove, 118 points.

Winner of Book Prize: Helen Borden, Canyon.

Baking Powder Prizes:—
Sarah Jaffray, Canyon, Watch.
Isobel Magilton, Mountain Grove, necklace.

Town Happenings

A delightful tea, sponsored by the "Lord Lascelles" Chapter of the I.O.D.E., was held at the home of Mrs. S. Piffman, Wednesday, Jan. 18, to raise funds for the purchase of milk tickets which are being distributed to needy families.

The Chapter wish to report that twenty dollars has been added to this fund and appreciate such loyal support and generous donations.

Marshall Murray, only son of Mr. and Mrs. Eli Murray, of Edmonton, and nephew of S. M. Murray, Lacombe died on Saturday last, following a serious operation. Marshall was well known in Lacombe, having visited his uncle here on several occasions, and was very popular with his young friends.

The ladies of the L.O.B.A. will hold a whist drive at their lodge room Nanton Street, on Feb. 1st, at 8 p.m. Prizes are as follows: 50 lbs. Flour; 10 lbs. Sugar; 1 pkt. Rolled Oats. Admission 25c. The ladies of the L.O.B.A. will provide lunch.

AUDITOR'S CERTIFICATE

I have audited the accounts of the Town of Lacombe for the year ending December 31st, 1932, and have compared the said accounts with their relative vouchers and certify that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs of the Town, according to the best of my information, the explanations given to me, and as shown by the records, subject to any qualifications mentioned in Auditor's Special Report herewith.

The statistical information contained herein was obtained from the books and records of the Town, or from information supplied by officials of the Town.

Dated at Lacombe this 18th day of January, 1933.

Signed: D. F. Chisholm; Address, Lacombe, Alta.

Britain Leads The Way.

Because of its importance as an essential factor in the economic and financial recovery of all nations, and because a reasonable, business-like settlement must be reached before that recovery becomes even possible, we offer no apology for again making the international war debts the subject of discussion in this column. Such discussion, if it is to be at all helpful, must, however, be conducted in a fair manner, arguments advanced must be based in justice and on reason, and nothing of a nature to provoke ill-feeling or prejudice indulged in. The whole object of such discussions should be to present facts, frankly outline and explain the actual position, and thereby seek to bring all nations closer together and into a more friendly understanding of each other's position, and the necessity of taking, not one-sided action, but in effecting re-adjustments which will prove beneficial to all.

First of all, let us again refer to the contention advanced by the Montana newspaper previously quoted by us, which presented the viewpoint of many people in that country that it was passing strange that Great Britain, while finding it difficult, in fact now impossible, to repay its debt to the United States in gold, was still able to devote 460 millions of dollars annually to military purposes.

Without attempting to analyse such payments in order to establish what proportion of them is accounted for by pensions, hospitalization, and other care of living disabled soldiers and sailors, and other payments which have to do with what is past and not as preparation for the future, we would present certain facts in support of our former statement that "Great Britain has reduced her military expenditures to a greater extent than any other country; that with a world-encircling Empire she is spending less, not only proportionately but actually, than the United States, much less than France, and that she is the foremost advocate of disarmament in the world today."

Great Britain does not maintain a large army, and never has done so. At the outbreak of the Great War it was so small that Germany looked at it with contempt. Such as it was, it was scattered all over the world, with the major strength in India, and units located at Gibraltar, Malta, Egypt, China, along lines of Empire communication. It was not an army of offense, but solely for defence; in a word, a necessary police force of the Empire. The British army is smaller today than before the war, and smaller than the army of the United States, almost insignificant compared with the standing armies of European countries.

Britains chief expenitures have been on its navy, and that navy was likewise a defensive machine for a sea-surrounded country with Dominions, colonies and protectorates located in all parts of the globe. It was designed and created to protect the sea-borne commerce of the Empire in time of war, whether Britain was involved in such war or not, and to be "a world policeman' in time of peace, to succor and protect British subjects and other people in all parts of the world where revolution or disaster might occur.

Bearing these facts in mind, and the further fact that the British Empire is not smaller because of the Great War, but larger, and its responsibilities toward backward peoples greater than ever before, let us ponder for a moment what Britain has done to lessen military, or war, expenditures and to promote disarmament throughout the world.

In the British House of Commons recently, the First Lord of the Admiralty declared that, so far from hindering disarmament, "Great Britain had given a most magnificent lead to the world." He quoted figures to support his assertion. In 1914 Britain had 69 battleships; by 1936, when the next conference on naval strength falls due, Britain will have only 15 battleships. Britain's cruiser strength in 1914 was 108; by 1936 it will be 50. Of destroyers Britain, in 1914; possessed 285; in 1936 the number will be 117. In submarines Britain in 1914 had 74; by 1936 she will have only 38.

Now let us compare total naval tonnage of Great Britain, United States, France and Japan as it was in 1914, and as it will be when the next naval conference meets in 1936. Here are the figures:

	1914	1936	Increase or Decrease
Great Britain	2,160,000	1,151,000	47% Decrease
United States	881,000	1,139,000	29% Increase
France	746,000	500,000	33% Decrease
Japan	522,000	720,000	37% Increase

Thus has Britain led the way towards disarmament. Its army, which is a threat to no nation but a domestic police force, is smaller than ever; its navy, upon which at any moment the very food supplies of the British people may depend, and upon which thousands of British subjects in odd corners of the world have to rely in time of trouble, has been reduced by almost one-half. Can Britain with safety go farther until other nations display a willingness to follow her example?

Even the figures given do not tell the whole story. Britain relies on cruisers more than any other type of ship to protect her far-flung colonies and protectorates. The life of a cruiser is estimated to be about 20 years. Nine of Britain's cruisers are already over that age, and by 1936 no less than 18 out of the total of 50 will be out-of-date.

France, Like Britain, shows a decrease in total tonnage, but in 1914 very many ships in the French navy were of practically no fighting value, while today the French fleet is very much up-to-date.

At the present time Britain has 36 cruisers in actual commission, of which 29 are abroad. In the past 18 months there were 18 urgent calls for cruisers to be sent to various parts of the world, all cases of dire necessity, and the British Admiralty now finds the greatest difficulty in answering such demands. We again ask, should Britain go farther, scrap more ships, allow such remands for assistance to go unheeded, and remove from a still unsettled world that protection which, it has been the pride and glory of the British navy, it has always provided when the call came?

No, Britain is leading the way in disarmament, just as it is in relation to problems calling for solution. It is now up to those who professedly approve of her policy to follow that leadership and give a helping hand.

French Cafe In Tree

Reached By Winding Staircase Built Around Trunk

In the branches of a tall chestnut tree at Sceaux, near Paris, France, a restaurant-cafe has been opened. Resting on the branches are the separate dining places, access to which is gained by means of a winding staircase built around the trunk of the tree. The food is conveyed from the ground in baskets attached to ropes.

"Wherever you are," says an article, "you can always find your way by noting the position of the moss on tree-trunks." Sea captains will be no end glad to hear this.

Canada's Trade

How Ratio Of Exports Has Increased During Last Century

A century ago when Canada was a group of separate colonies with a population of slightly over 1,000,000 the ratio of exports was $3.50 per person; today, with a population of 10,000,000, the ratio of exports is more than $60 per person. These, and other enlightening statistics were given by Hon. H. H. Stevens, Minister of Trade and Commerce, in a short talk on "Canada's Rise in the World of Commerce." It was given under the auspices of the Professional Institute of the Civil Service of Canada.

Pains Around Her Heart

Tired Out After Doing Housework

MILBURN'S HEART AND NERVE PILLS

Mrs. Henry Ranch, Muriel Lake, Alta., writes:—"Last fall I had bad pains around my heart, and each morning, after doing a little housework, I seemed to get dizzy and feel all tired out.

Seeing that Milburn's Heart and Nerve Pills were good for these troubles I sent for a box, and after taking the Pills for a few days I felt a whole lot better. Since then I have had no return of the dizzy spells and pains around the heart."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Work Nearly Completed

Mishaps Delayed Cleaning Up Channel To St. John Harbor

For two years men have been engaged in removng ledges on the eastern side of Partridge Island and in straightening, as a consequence, the main channel leading into Saint John harbor. More than half the work has been completed.

The history of the undertaking dates back to the spring of 1929, when the S.S. Duchess of Richmond ran aground on the island. It was before daybreak, thick fog prevailed, and the ship had not acquired sufficient steam to counterbalance a strong tide. At two subsequent sessions of the Dominion Parliament, $650,000 was voted for the channel development.

Work was delayed briefly by two mishaps. In October of last year the dredge "Leconfield" sank after an anchor punctured the hull. The crew scrambled to safety aboard a tug. Later, a rock breaker purchased at Halifax sank off Nova Scotia while being towed to Saint John. Another rock breaker is engaged in the work as well as two dredges, including the "Leconfield," which was salvaged and repaired.

The ledges are being reduced to a minimum of 30 feet below the surface at low water.

Japs Are Experimenting

Hope To Make Shoes Out Of South African "Bagworm"

One of the commonest of American insects, which harbor in evergreens such as arbor vitae, juniper, or cedar, and work particular damage to the foliage, known as the "bagworm," will be utilized by the Japanese in making shoes, purses, and other articles, if present plans materialize, according to a report from Consul H. S. Fullerton.

Recently, the Timber Growers Association, of Pietermaritzburg, capital of Natal, South Africa, shipped to Japan a quantity of South African bagworms which are about twice the size of the Japanese variety, at the request of Japanese silk manufacturers.

Just how the Japanese plan to utilize the bagworm is not known, but it is pointed out that the bagworm belongs to the silk worm family, and is called by that name because of the small bag it constructs out of its own silk. Whether the Japanese may be able to spin the material or utilize it by cutting and sewing it in various shapes is not known.

Services No Longer Needed

Advance Of Education Does Away With Street Letter Man

The once thriving business of public letter writer in Boston's Syrian colony is a thing of the past.

The Syrian colony, numbering 20,000, now writes its own letters, or else the older members who still are illiterate have children to write for them.

The disappearance of the colorful street letter writer, a calling handed down from generation to generation back to the ancient city of Damascus, was blamed on present-day immigration laws which insist immigrants be able to read and write.

Willing To Buy One

Dog Owner Inquired Where Veterinary Could Be Purchased

Dr. Gerry B. Schnelle of the Angell Animal Hospital at Boston, tells this one:

A woman was describing to him over the telephone the condition of her sick dog, and when she explained that she couldn't bring him to the hospital, Dr. Schnelle advised her to get a veterinary.

"Would you please spell that word out, doctor?"

Dr. Schnelle spelled it.

"And now," she asked, "can I get that at a drug store?"

Covering Rose Bushes

Rose bushes must be covered in winter not, as is generally supposed, to keep them from freezing, but to keep them from thawing once they have frozen, according to George Beach, assistant horticulturist at the Colorado Agricultural College at Fort Collins. Beach said that a loose covering of leaves would serve the purpose.

Saved Ten Pages

The most widely-read book in New York—the directory of the New York Telephone Company—appeared in its winter edition with the courtesy title "Miss" eliminated from the names of more than 12,000 unmarried female subscribers. The company said by deleting the title it cut 10 pages from each of the hundreds of thousands of the bulky books published.

About 50 per cent. of the silver produced in the United States is a by-product of copper, zinc and lead ore.

"That car costs £2,500. It will do absolutely anything."

"Er—haven't you something a little more—er—reluctant?"

One theory of the origin of the Eskimo is that he is descended from the Indian of North America.

CLEANING HISTORIC FIGURES

Considerable success has attended the first tentative experiments in cleaning the famous wax effigies in Westminster Abbey. These figures have rested in their glass cases for centuries and some experts predicted that they would fall to dust if removed from their sealed boxes, but such has not proved the case. Here we see Queen Anne, whose garments have always been a source of interest, chiefly because they could not be seen. Ladies will be surprised to learn that a gingerly peep revealed that under her fine brocade Queen Anne is wearing a leather rubicoat.

"Bricks" Of Oxygen

Discovery Will Lead To Saving Of Countless Lives

An extraordinary discovery is announced from Germany, where a method has been found of solidifying oxygen into small "bricks" and of so fixing the solid gas that it can be contained with safety in an ordinary sealed tin. In this it can be kept for years without deterioration.

Despite the terrific pressure used to solidify the gas, there is no danger about these oxygen bricks, which cannot explode. Each of them, though, contains as much gas as would fill one of the great steel cylinders now used as containers at a pressure of hundreds of pounds to the square inch.

This discovery will lead to the saving of countless lives, for oxygen is the life-giving gas. The miner can carry an emergency supply with him and it can be kept in the house for use in case of serious illness.

The oxygen is released by giving the tin a sharp blow which brings two chemicals into contact with one another by breaking an inner glass vessel. This sets up a gentle warmth, which causes the brick to give off gradually the gas it contains. The process of making the bricks is not expensive and a complete oxygen tin will not cost more than about 42 cents.—Tit-Bits.

Such Is Fame

Story From Chicago Proves Popularity Is Short Lived

There is a touch of pathos as well as considerable food for thought, in a story from Chicago to the effect that at an auction sale seven autographed photographs of once-famous idols of the stage brought only $1 for the lot. In their day these artists delighted great audiences, felt the thrill of genuine enthusiastic applause, and revelled in general popularity. Then the possessor of one of their autographed photographs was regarded as fortunate. Today it brings about 14 cents.

The moral of course, is that the public is fickle. Now stars arise. Age begins to take its toll of former favorites and they pass from view. "The King is dead! Long live the King!" "Imperious Caesar, dead and turned to clay, might stop a hole to keep the wind away." Marcus Aurelius had the right idea when he said: "All is ephemeral—fame and the famous as well."—Toronto Globe.

One Of Our Widely Distributed Trees

Aspen poplar is one of the most widely distributed trees in Canada, being found in every province of the Dominion. Its northern limit extends almost to the Arctic Ocean, at the Mackenzie delta. From the wood of the aspen are made excelsior, boxes and barrels for foodstuffs, and certain kinds of wood-pulp. Lumber made from it is difficult to season and very perishable. In the Prairie Provinces it is an important source of fuel.—Forest Service, Department of the Interior, Canada.

A record of the colors of 3,900 bricks, collected from all parts of the country, has been made by the U.S. Bureau of Standards. Colors range from light buff to deep red.

Football is said to have become so popular with South Americans that they've been known to leave a revolution for a couple of hours to watch the home team play.

Greatly-Improved Formula
NEW WAY PLASTIC LEATHER
Resoles Shoes for a Few Cents
No hammer, nails or tacks. Easily applied. Spreads like butter on bread. Hardens in a few hours, giving a hard, long wearing, flexible sole at small cost. Also mends rubbers, overshoes, auto tops and tires. Extra large 20-oz. can, only $1.00, postpaid. Trial size 7-oz. tube, 50c. Order direct.

Honored By France

Woman Restored Mutilated Faces Of Poilu After War

For the work she did after the war in aiding plastic surgeons in restoring the mutilated faces of French poilu by creating life-lasting "portrait masks," Mrs. Anne Colman Ladd, Boston sculptor, has been awarded the Cross of the Chevalier of the Legion of Honor.

"The method I used for my portrait masks," said Mrs. Ladd, "was technally this: A mask of the mutilated face was made. Then, working from photographs, or verbal descriptions, I would build up the missing or ruined features with their natural expression in the plaster cast. From this a gutta percha mask was hung in a copper bath for two days. The thin copper sheeting was then silvered and painted with a special enamel that would match the skin tone of the subject as nearly as possible. If the wounded man was blind, the mask would be equipped with false eyes, and with spectacles, eyelashes, eyebrows, and even a moustache. The masks were light and durable, and they will last a lifetime.

"These men could walk the streets and be recognized by their friends and relatives. They could smoke and twirl their moustaches.

"I have many touching letters from men I have been able to help."

Outstanding Flights

Four Of Most Spectacular Were Made Last Year

Mrs. Putnam, nee Amelia Earhart, made the first solo woman's flight across the Atlantic, landing at Londonderry in May.

In July, von Gronau flew from Germany to Montreal in two days, stopping in Iceland, Greenland and Labrador on the way.

In August, Jas. A. Mollison made the first solo Atlantic flight from east to west, starting from Ireland and landing at Pennfield Ridge, near Saint John, N.B. Mollison used a small Moth biplane.

Mrs. Mollison, nee Miss Amy Johnson, who made a spectacular flight to Australia before she was married," lowered her husband's record for a Croydon-Cape Town flight, flying a similar machine.

Turkey Plans Air Service

Will Cut Three-Day Train Journey To Few Hours

With the recent arrival at Istanbul of two Curtiss Wright six-passenger monoplanes, the first definite step will be made in one of the most important aviation developments of the last few years.

The two twin-motor aeroplanes will inaugurate air travel between Istanbul and the capital, Angora.

The line, about 250 miles long, will be the first eastward prolongation of the air route linking the capital of Europe with the Bosphorus. It will cut down a three-day train journey to a few hours but it is the development which it heralds that is drawing the attention of travellers and business men, not only in Europe but the world over.

Remembered the Engineer

Driver Thanked By Only One Passenger In 44 Years

During 44 years of service as an engineer on "The Seminole," de luxe Illinois Central railroad passenger train, Elmer "Dad" Sabin, Champaign, heard "thank you" on only one occasion from a passenger.

The one "thank you" came from an elderly man and his daughter on a Christmas eve after they had left the train Champaign. Sabin recalls that trip had been made through a blinding snowstorm and that the man and his daughter walked in the face of the storm toward the cab to thank him for carrying them safely to their destination.

Sought Safe Route

Man Taking Giraffe To Liverpool Had His Troubles

A man called at the London headquarters of the Automobile Association and inquired for the heights of all the bridges over roads between London and Liverpool.

"I have to take a giraffe up to Liverpool by road," he said, "and its neck is so long that its head is 20 feet above the ground.

"It cannot go under all the bridges without bending its neck—and it does not know when to do that."

A safe route was found.

Helping the Poor

Eight cents now pays for a medical consultation, treatment and a bottle of medicine in the poor districts in Liverpool, England, where three experienced doctors carry on the work of the cheap dispensaries.

An old Cleveland ordinance makes it illegal to display the wrong time on a public street. Visitors with dimesized wrist-watches will do well to keep them under a cuff.

Snowy owls, with wing spread of six feet, are flying south from the Arctic.

One pound of pure raw silk can be woven into about 20 yards of silk cloth.

AUDITORS' CERTIFICATE

TO THE SHAREHOLDERS, THE ROYAL BANK OF CANADA:

We have examined the above Statement of Liabilities and Assets at 30th November, 1932, with the books and accounts of The Royal Bank of Canada and with the certified returns from the branches. We have verified the cash and securities at Head Office at the close of the Bank's fiscal year, and during the year we checked the cash and examined the securities at several of the important branches.

We have obtained all the information and explanations that we have required, and in our opinion the transactions of the Bank, which have come under our notice, have been within the powers of the Bank. The above statement is in our opinion properly drawn up so as to disclose the true condition of the Bank as at 30th November, 1932, and it is as shown by the books of the Bank.

A. B. BRODIE, C.A., of Price, Waterhouse & Co.
JAS. C. HOSS, C.A., of P. S. ROSS & SONS. } Auditors.

A Master Surgeon

Mother Of Three Children Enthusiastic About Her Work

A mother of three children has been awarded the degree of Master of Surgery—one of the highest medical honors. She is Mrs. Phillipa Parry Martin, opthalmic surgeon at the Elizabeth Garrett Anderson Hospital for Women, and she is the only woman to have passed for this degree and that of F.R.C.S. at the first attempt.

"Surgery is one of the finest careers for women," she said when interviewed. "It brings out the human side of a woman and makes her a better mother. I am not one of those who believe that a woman cannot work and run house, and the home is happier for it." Mrs. Martin's three small daughters all intend to become doctors. Mrs. Martin is the wife of E. K. Martin, another Master of Surgery.

Scored Success In Opera

Artist Had Not Played Part For 34 Years

John Forsell, the head of the Royal Opera of Stockholm and one of Sweden's foremost operatic artists, recently saved a performance at the opera when the singer who was to take the part of Lothario in Mignon suddenly became indisposed and was unable to appear. Mr. Forsell had not played the part since 1898, and there was no time for a rehearsal, but he courageously donned the costume of Lothario, and stepped upon the stage, where he acted the part with his usual skill. He was greeted with ovations by the audience who marvelled at this unique feat by a man 64 years old, who thereby once more proved himself to be worthy of his position as the pronounced favorite of the opera-goers of the Swedish capital for nearly 40 years.

To draw a check on a bank without having sufficient funds on deposit it has just been made a crime in Norway.

More than 1,600 types of alloy steel have been developed by steel research workers.

Incapacity for work caused by rheumatism cost Britain $100,000,000 in 1932.

Chemically produced "death rays" explode gunpowder charges 500 feet away.

Best Credit Risk

Working Girl Rates Highest Says Secretary Of U.S. Exchange

There was a time when the phrase "pity the poor wolking girl" would make strong men cry and stern women soften in sympathy.

But no more, for, as Ralph Walker, secretary of the Mutual Credit Rating Exchange of St. Paul, says, she has become one of the best credit risks in the United States.

She has attained that rating, Walker explained, because she used her credit judiciously, knows what margin she has for spending and for credit buying, is a budget maker, and keeps within her income.

As a class, Walker says, single women are better credit risks than single men, because men take chances; women don't. Women also are the reason why the low-salaried married man is one of the best credit risks, he said.

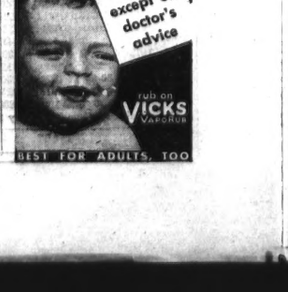

Builds Cheap 'Plane

Engineer Rolf Meyer has brought out an aeroplane under the slogan "cheaper than the cheapest automobile." It will sell below $250. It is equipped with an air-cooled two-cylinder motor, can attain a speed of 60 miles an hour, and was licensed by police after demonstration flights at Koenigaberg, Germany.

Elevators which travel up and down in a curved arc are being built for ascent around the bulging sides of naval dirigibles.

The Irish Free State has granted a 12½ per cent. bounty on cattle exported.

BABY'S COLDS

BEST FOR ADULTS, TOO

Treeless Prairies Will Soon Be A Thing Of The Past As Result Of Forestry Campaign

Extended stretches of treeless prairie are now the exception in Western Canada. Thirty years ago these were common. Since the Canadian Government instituted a tree-planting division in 1901 under the administration of the Department of Interior (recently transferred the work to the Department of Agriculture), a total of 117,225,936 trees have been distributed free to farmers in the Prairie Provinces. Of this total 115,190,070 were deciduous or broad-leaved trees and 2,035,866 were coniferous or evergreen.

Sufficient seedling trees to establish shelter belts have been sent out from the Canadian Government Forestry Stations at Indian Head and Sutherland, Saskatchewan, to as many as 6,000 farmers every year for the past thirty years, or an average of about 4,000,000 trees per year. In addition to the free distribution, millions of trees have been sold in the Prairie Provinces—Manitoba, Saskatchewan and Alberta—by owners of prairie farm homes, which formerly stood out on a somewhat bare and unrelieved landscape, are now sheltered by girdles of stout trees, which not only serve as windbreaks, but help to conserve the moisture and make a decided contribution to the attractiveness of the surroundings. The trees that are the most popular among farmers in Western Canada are Caragana or Serbian pea, Manitoba maple, ash, poplar and willow.

The "treeless prairie" passed into the limbo with many other things about the close of the nineteenth century.

Dominion Seed Branch

Effective Work Carried On For Benefit Of the Agriculturist

The Dominion Seed Branch encourages the production of superior seeds for domestic requirements and export; performs field inspection of seed crops for registration, and for certification as to purity of variety and quality; grades all field seeds offered for sale on the basis of control samples or of official samples drawn by inspectors; maintains laboratories for the analysis of seeds, feeding stuffs, fertilizers, binder twine, insecticides and fungicides; supplies markets information and develops the marketing of these products, and of hay and straw which are graded on request administers the Seeds Act, Feeding Stuffs Act, Fertilizers Act, Inspection and Sale Act, and Agricultural Pests Control Act. The branch organization includes four main divisions, and for the enforcement of the Acts Canada is divided into seven inspection districts each supported by a service laboratory.

Velocity Of Tennis Ball

When In Action It Travels 93 Miles An Hour

If a tennis ball were an aeroplane it could fly across the Atlantic in 35 hours, for it covers 93.3 miles an hour when in action. That is the speed which the ball attained when one of the players volleyed in the Davis Cup match between Germany and England. Service balls sped across the net at "only" 68.5 miles an hour. Even the slower balls sailing from base line to base line went at a rate of 31 miles an hour. In the match between Henry W. Austin and Daniel Prenn the balls travelled a distance of 28½ miles, for which purpose 2,000 shots had to be exchanged.

A Long Telephone Call

Australian Talks Over 16,000 Miles To Massachusetts Friend

One of the longest telephone calls ever recorded at Newton, Mass., was made Christmas Eve by Tom Elder Barr Smith, Jr., to wish Arthur W. Ingalis of Newton a Merry Christmas. Smith was phoning from Adelaide, Australia, a distance estimated at 16,000 wire miles. The call was made via Port Said, London, New York and Boston.

And the expression of good will was not at all premature, because Christmas already was well under way, "down under," owing to difference in time when the call was put through.

Stream Flow In the Middle West

In southern Alberta, following average to above average run-off in May and June, stream flow has been continuously below normal, averaging only from 60 to 70 per cent. of the average monthly flows from July to October, inclusive, according to records of the Dominion Water Power and Hydrometric Bureau of the Department of the Interior. In southern Saskatchewan the run-off has been even less and the summer flow, from May to October, inclusive, has had a monthly average only 35 to 55 per cent of normal.

Whales are to be caught by electricity, which will stun them and cause them to rise to the water's surface, in the White Sea, Russia.

The Holiday Massacre

Appalling Number Of Fatal Accidents On English Roads During Summer

During July and August an average of 17 people were killed every day on the roads of England and Wales. Of the 1,017 accidents responsible for their deaths, less than two per cent. were unavoidable. And in over 85 per cent. it was the man and not the machine that failed. Four hundred and fifty-three of those killed were motorists, 406 pedestrians and 193 pedal cyclists. In the list of vehicles involved motor cars came first, motorcycles a good second; then motor vans and lorries, closely followed by bicycles. Seventy per cent. of the deaths occurred in towns and builtup areas (a fifth of them in Greater London). Half of the motor drivers involved had over five years' driving experience, but two-thirds of them were between 16 and 29. Twice as many boys were killed as girls. The most dangerous age for children is between four and five; but almost all the children between 13 and 16 were killed while cycling. These grim data are taken from the National Safety First Association's interim report on road accidents during the holiday months.—London Spectator.

Worth More Than Gold

Weight For Weight Pansy Seed Has Higher Commercial Value

Weight for weight, pansy seed is of a higher commercial value than gold. According to reliable nurserymen who distribute hundreds of pounds of pansy seed to growers and wholesalers, an ounce of pansy seed is worth $40.00 or $640.00 a pound, while a pound of gold (16 troy ounces, is worth only $330.72). Thus pansy seed is worth almost double the same weight of gold!

The individual pansy seed is hardly larger than a grain of sand. But a pound of the seed will produce approximately 160,000 plants.

So valuable is pansy seed that dealers keep it in vaults and safes.

By Ruth Rogers.

PRACTICAL UNDIES FOR BROTHER AND FOR SISTER

Easily made. Here you have two patterns—an underwaist and pants for brother. The pants button on to the waist. And an underwaist for sister with bloomers that also button on to the waist.

They require such a small amount of material to fashion them. And simple—well I guess! You could almost run them up before breakfast.

Several sets could be made in a single day of excellent quality fabric that will tub and tub. When you shop—look on the remnant counters, the saving will be enormous.

Batiste, cross-barred dimity, linen, pongee and novelty ribbed cotton fabric are sturdy.

Style No. 848 is designed for sizes 2, 4, 6 and 8 years.

Size 4 requires 1½ yards 35-inch for either Brother or Sister suit.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How To Order Patterns

Heavy Gold Shipment

Early In War $90,000,000 Taken From Vancouver To Ottawa

Britain's debt to the United States, $95,500,000, may seem a lot of money to change hands at one time, and it is, but there are men in Montreal who can remember a larger gold movement than that, and a longer one too.

It was during the early years of the war, according to J. R. Martin, manager of the foreign department of the Canadian Express. The then Dominion Express was given an order to move $96,000,000 from Vancouver to the Royal Mint vaults at Ottawa. There were 13 cars on the bullion train, nine of them held gold and four guards each. The others were supply cars, carrying relief guards and officials. The whole trip was made in 90 hours, with stops only to change engines.

The train was given precedence over everything else on the Canadian Pacific Railway. With men riding on the cow-catcher, armed with sawed-off shotguns and revolvers, it was probably this train that started the rumor that a Russian army corps had been transported across the Dominion.

There were succeeding heavy gold shipments, one of $68,000,000, and many ranging between $10,000,000 and $20,000,000. All told, during the war something between $1,250,000,000 and $1,500,000,000 was moved, Mr. Martin said.

Vatican Prizes Old Atlas

Ancient Greek Maps One Of Treasured Possessions In Library

After thirty years' work, which Father Fisher of the Society of Jesus has superintended, the Vatican Library has published a magnificent edition of the oldest atlas of western geography. It is a faithful reproduction of the Greek Codex by Claude Tolomeus.

The collection, which dates from the 11th or 12th century of our era, is one of the most treasured possessions of the Vatican Library.

The atlas is bound up in four volumes, the first containing photographic reproductions of the most ancient maps.

Hint For Poultry Feeding

Wheat Should Always Be Mixed With Corn and Oats

While soft wheat is usually considered more palatable for poultry, there is really little, if any, difference in the food value between hard and soft wheat. Wheat, however, should never be used alone in feeding poultry. Digestive disturbances have been reported when fowls are fed on a pure wheat diet and these disturbances were accompanied by loss of appetite and body depression. It is advisable, therefore, to mix wheat with corn and oats, using equal parts of each. It will not be necessary to grind or soak it when you feed it. Simply mix it with the other grain as indicated.

Canada's Trade Position Good

Toronto Globe Says Dominion Faces Future With Courage

Canada faces the future with courage and in a sound national position the Toronto Globe said in its annual financial and trade survey. Canada has met all her financial obligations, has no war debts except to her own people and leads the world in production of printing paper, nickel and asbestos the review adds.

Canada holds second place in world production of gold, platinum and cobalt, third in production of wheat and zinc, and fourth in production of automobiles, copper and lead, the review continued.

Cannot Grow Everything

English Gardeners Have To Have License For Some Things

A Corringham (Essex) man, instead of growing cabbages, planted tobacco in his back garden.

The leaves were cut, and were mellowing when the customs seized the whole crop as "contraband." Officers from London went to his garden and carried off the plants.

Cultivation of tobacco in England is permitted only under license, and is subject to an excise duty equivalent to the customs duty levied on empire-grown tobacco.

Other things which may not be produced in Britain, except under license, include coffee, silk and sugar.

System Takes Time

Telephone Operators In Province Of Quebec Translate Conversations

If you can't speak French and the other person can't speak English, don't be discouraged, for the province of Quebec telephone operators can right matters. To remove the language barrier on out-of-town calls, the first step is to tell the operator what you wish to ask the other person. She then translates and upon receiving the answer translates it back to you. The system takes time, but satisfaction results.

White: "Your wife used to be so nervous. Now she seems quite cured."

Green: "She is. The doctor told her nervousness was a sign of old age."

AMY'S WONDERFUL WELCOME AT CROYDON

It must be a hard job for press photographers to keep track of Amy Johnson Mollison, considered to be one of the finest aviators in the British Empire. One day she is in Cape Town, then in Paris, and again in London. Here we see her receiving a wonderful welcome at Croydon, London, at the completion of the round trip to Cape Town and back in record time. With Mrs. Mollison is her husband, Captain Mollison, who also holds several records for flying. In the background between the happy couple is Sir Malcolm Campbell, holder of the world's land record for automobiles.

Turnips Are Popular

Canadian Product Is Favored In Markets Of United States

"Imported" turnips are becoming popular in U.S. menus, according to statistics which have been issued by the Canadian National Railways concerning Canadian turnips.

"By such humble instruments as the turnip, Canada's foreign export trade is being advanced," states the agricultural department of the railroad. "Because of its tender quality, the Canadian turnip has been finding sudden favor in markets in the United States as widespread as from New England to Florida and as far west as Texas. During the past year the Canadian National Railways shipped no less than 2,000 carloads or about 1,200,000 bushels of turnips to points in the United States. Refrigerator cars are used exclusively in handling the traffic. These turnips all come from farms in Eastern Ontario and Prince Edward Island, the entire crop of the latter province being sold to the New England and New York markets."

Grow Oats In China

Canadian Oats Introduced By Missionary May Help To Supplant Rice

Canadian oats have been acclimatized to conditions in western China and are being distributed in quantity from West China Union University, Chengtu, a missionary institution, to government experimental farms and to the hill tribes in Szechwan province for 1933 sowing.

The original supply was brought across from Canada eight years ago by Rev. Frank Dickinson, B.A., M.Sc., a Canadian missionary, and tended by him in plot and field every season since.

In the Chengtu plain the staple diet is rice and in the hill country the tribes rely mainly on Indian corn. Under this condition it is considered that the introduction of oats will add ultimately an important article to the diet of large numbers of people. The experiment has not yet reached the commercial stage, but will be watched with interest.

Means What It Says

"Until death do us part" means something when Prince Edward Islanders stand before the altar. There was not one divorce action in the province during 1932, and only two divorces have been recorded since confederation.

Coal production in Germany is increasing.

Expect New Record

More Buyer's Looked For At British Industries Fair

Months before the opening date the number of overseas buyers who have signified their intention to visit the British Industries Fair at Olympia and the White City, London, and Castle Bromwich, Birmingham, is more than 30 per cent. larger than the corresponding number last year, when the attendance of buyers set up a record.

The department sends out under special invitations to some 6,000 buyers in about 100 different overseas countries and territories. The fair, which will be held from February 20 to March 3, will be larger and more varied than any of its predecessors. The area booked by exhibitors is 21 per cent. larger.

Big Sale Of Canadian Tobacco

Ontario Growers Obtain Handsome Returns On Crop Last Season

One of the largest tobacco manufacturing companies in England has recently bought 8,000,000 pounds of Ontario-grown tobacco, according to a statement issued by the Ontario Government Minister of Agriculture. This transaction is reported to complete the disposal of the 24,000,000-pound crop of flue-cured burley tobacco produced in Norfolk County, Ontario, which has returned about $4,000,000 to the growers.

In recent years the sale of Canadian tobacco in the British Isles has been increasing due to the improvement in the quality and the preferential tariff accorded by British on tobacco grown in Canada and other parts of the British Empire.

Lack Of Confidence

The World Needs More Confidence To End Depression

The world lacks confidence more than anything else—a thousand times more than it lacks gold. And it does not seem within even the outer realms of possibility that the world can regain confidence by any plan which economists or statesmen can devise so long as these vast international liabilities (the war debts) hang threateningly over it. Bulletin, Sydney, Australia.

A camera for aeroplane panorama photography registers 270 square miles.

More than 250,000 varieties of flowering plants are found in the British Isles.

PASSENGER: "We can't sit here all day, driver! What are we going to do?"

DRIVER (fed up): "Well, 'ow about making a nice snowman?"—The Humorist, London.

Much Annoyance Is Caused By Heavy Exchange Rates Against Canadian Dollar In U.S.

Canadians are both annoyed and mystified by the treatment the r dollars receive in the United States. They know that conditions across the line are much worse than in the Dominion. Also, they are aware that, while banks in the Republic have been collapsing by the hundreds, there is not even a whisper against these institutions in their own country. Of course, the people of Canada realize that this condition is brought about by mysterious agencies such as exchanges and the balance of trade, but these explanations do not satisfy. This question is dealt with sympathetically by the Saginaw (Michigan) News in the following editorial comment:

Canada does not understand but does resent the continuing fall of the Canadian dollar on the New York money market. Apparently it is a sympathetic reaction to the drop in the British pound sterling, accentuated by the war-debt mess. As a matter of fact, though, the Canadian financial system has nothing to do with the British system of which it is entirely independent. And Canada has no foreign war debt. It bore the entire and heavy cost of participation in the war through internal loans and internal financing, and owes no other country anything on account of the war.

A Canadian $82,000,000 internal loan was oversubscribed; no Canadian obligation has been defaulted in the United States; Canada has maintained its export trade at a higher percentage than this country; it has had no bank failures all through the depression; no disorders; no defaulted Government bonds; no element of insecurity for private investment; but it finds its dollar heavily discounted. In the circumstances it is not to be wondered at that the Canadians are puzzled over the problem.

It is an issue which should interest this country because one effect of the decline is further to discourage Canadian buying in the United States. And Canada hitherto has been a very good customer.

It will be noted that the Michigan paper dwells upon the discouragement of Canada buying in the United States, and admits that "Canada hitherto has been a very good customer." After all, apart from being a cause of annoyance, this discount on the Canadian dollar does not greatly affect the individual Canadian, if he stays at home. True, it has checked his buying of United States goods, and stopped many little excursions over the border, but this country is not the loser by that condition.—Toronto Globe.

The Wheat Kings

Canada Has Won Highest Award In Wheat Eighteen Times

Since the contest for the world's wheat championship was inaugurated in 1911, Canada has won the highest award eighteen times. At the last International Grain and Hay Show held at Chicago from November 26 to December 3, 1932, inclusive, 80 of the 85 awards for hard red spring wheat went to Canadian competitors, including the championship won by Herman Trelle of Wembley, Peace River, Alberta. The winners of the championship in the past twenty-two years are as follows:—

1911—Seager Wheeir, Saskatchewan.
1912—Henry Holmes, Alberta.
1913—Paul Geriach, Saskatchewan.
1914—Seager Wheeler, Saskatchewan.
1915—Seager Wheeler, Saskatchewan.
1916—Seager Wheeler, Saskatchewan.
1917—Sam Larcombe, Manitoba.
1918—Seager Wheeler, Saskatchewan.
1919—J. C. Mitchell, Saskatchewan.
1920—J. C. Mitchell, Saskatchewan.
1921—G. W. Kraft, Montana, U.S.A.
1922—R. O. Wyler, Saskatchewan.
1923—Major H. G. L. Strange, Alberta.
1924—J. C. Mitchell, Saskatchewan.
1925—J. P. Yates, Montana, U.S.A.
1926—Herman Trelle, Alberta.
1927—C. Edson Smith, Montana, U.S.A.
1928—C. Edson Smith, Montana, U.S.A.
1929—Jos. H. B. Smith, Alberta.
1930—Herman Trelle, Alberta.
1931—Herman Trelle, Alberta.
1932—Herman Trelle, Alberta.

Russia Issues New Order

Housewives Under 56 Deprived Of Bread and Sugar

On the eve of the end of the five-year plan Russian housewives under 56 learned that beginning with the first of this year they would be deprived of bread and sugar, of which they now receive small rations.

This action, reflecting the food shortage in Russia, is an extension of the government's "no work—no food" policy and apparently is designed to inject more women into industrial occupations with the view to ultimate abolition of the home as the unit of family life.

At the height of the campaign which has been waged for several years to draw more women into industry a census of Moscow showed there were approximately 100,000 housewives in the city at the end of 1931. At that time it was estimated the number would be reduced by half at the end of this year. Eighteen per cent. of the 100,000 were over 60.

A Famous School

Law School At Dalhousie Produced Three Prime Ministers

The law school at Dalhousie consists of only about one small dark room, with ancient desks on which are carved initials of many of Canada's illustrious men. Around the walls are hanging pictures of the graduating classes. One can pick out no less than three Canadian prime ministers, Sir John Thompson, Sir Robert Borden and Mr. Bennett. Many names are to be found of men who have made their mark in the legal profession, on the bench, in politics and in business across Canada.—London Free Press.

Good News For Dog Lovers

Dread Disease Of Distemper Can Be Prevented and Cured

After ten years of patient research two English scientists have made a discovery which will be welcomed by all dog-lovers. Distemper, the dread canine disease can now be prevented and cured.

That their research involved experiments upon hundreds of dogs may be distasteful to some people but any suffering that may have been caused to these animals is amply justified by the results.

Urges Music Study

Study of music in the schools, not with a view to a professional singing career but as a valuable adjunct to success in salesmanship or in any other lines of business endeavour, was recommended in Toronto by Edward Johnson, native of Guelph, Ont., and distinguished tenor of the New York Metropolitan Opera Company.

"I see you are letting your little son drive the car."

"Yes, he is still too young to be trusted as a pedestrian."

France has been seeking ways for government support of the wheat market.

Canadian Wild Goose Is Shot In Princeton, Illinois

Recently the National Parks of Canada, Department of the Interior, received a report stating that a wild goose wearing a band of pink celluloid inscribed "Canada 99" was killed near Princeton, Illinois. Anyone knowing anything about the placing of this band would help materially by advising the Department of the Interior at Ottawa so that the record for this bird may be completed. The Canadian and United States Governments co-operate in banding investigations and in this way much new and valuable scientific data concerning the migration, and of breeding and wintering grounds of birds is being obtained. The use of other than official bands is not encouraged because unofficial bands have a tendency to confuse the Official Records. Information about the free distribution of official bands may be had upon application to the Commissioner of National Parks, Department of the Interior, Ottawa, Canada.

Another Unidentified Bird Band

Bank Washes Money

Handles All Cash Taken In Adjoining Fish Market

There is a bank close to Billingsgate which handles most of the cash taken in that fish market. This bank set apart a room as a "laundry," where more than 200 pounds of silver received from the market used to be cleaned every night. Attached to almost every coin were scraps of fish and freezing salt, and frequently the money turned green. The coins were boiled several hours in a solution containing washing soda and various chemicals.

Now some fish firms clean their money before sending it to the bank, but nearly all manage to keep coins away as much as possible from contact with the fish. Most of the bank notes, though, that pass through the market are still sent to the Bank of England to be destroyed.

A Strange Sight

One of the strangest sights in the world is on a mountain top of Luzon, Philippine Islands. Fully clothed and sitting in groups of from ten to twenty-five each, there are hundreds of bodies of Igorots which have been mummified by the hot, dry air—their method of burial. It resembles a vast picnic.

The University of Javia, Italy, was founded by Lothaire, grandson of Charlemagne, in 825.

The man who is the life of the party at night is rarely the life of the business next day.

James White has been appointed manager of Safeway Store, here, Mr. Walters having been removed to Edmonton.

H. J. Powell, who shot Carl Berg, while hunting was arrested last week by Const. Ralph James of the R.C.M.P. on a charge of manslaughter. The hearing was to have been held in Lacombe on Saturday next before Magistrat Edwin H. Jones, but a remand of a week has been given.

If you want to spend a real evening of enjoyment, go to the big U.F.W.A. dance at Spruceville hall, on Friday, February 3rd. Hot dogs and pie "the kind that mother used to make" will feature at the lunch. There will be a prize waltze, and the best dancing couple will receive a valuable prize. It will be a real event and you should not miss it. Do not make any other arrangements for Friday, February 3rd, and if you have already made other arrangements, call them off and attend this dance and have one whale of a time. Sweet's Orchestra will play.

A real game of hockey was played on the local arena on Tuesday night when Olds won a 5 to 3 victory over Lacombe. The game was exceptionally fast in spots, but at times was somewhat draggy. At one time in the game, Olds was in the lead 4–1, but in the last five minutes of the second period, Lacombe scored two counters, placing the score at the end of the second 4 to 3. Olds got another goal in the last period. The outstanding player on the Lacombe team was unquestionably Jimmy Fraser, whose back-checking and stick-handling at times was nothing short of miraculous. Lacombe plays at Ponoka tonight, and a good game is anticipated.

The Native Sons played a 3 to 3 draw game with Bentley on Monday night in the local arena. Lacombe boys got a 3 to 1 lead on Bently early in the game, but the Bentley boys, playing great hockey tied things up. These games are well worth seeing and are drawing larger crowds all the time. Turn out to the next one and see for yourself.

AT THE AVALON

"The Phantom President"

The picture marks the debut of George Cohan, for a quarter of a century a leading figure in the American theatre, in talking pictures.

In it he plays two roles—a presidential candidate and a medicine-show barker. Clever campaign managers discover the medicine-barker and hire him to impersonate the candidate until election day. When he gets to work, voters rally in ever-increasing numbers to the candidate's standard, and it looks like a sure walkaway for him until a dramatic, if amusing rift develops between the two men who look alike.

The rift is partly caused by their battle for Miss Colbert, cast as daughter of an ex-president, with whom they fall in love, and partly by the fact that the barker discovers the candidate has made a "deal", whereby he will grant certain political favors if elected.

COMING: Double Feature. Joe E. Brown in "The Tenderfoot" and David Manners in "The Crooner", Feb. 3 and 4.

"70,000 Witnesses," a great rugby mystery story. Feb. 10 and 11.

Show opens Friday 8:30; Sat. at 7:30 and 9:15.

Fairview News

We are having very nice weather and the farmers are improving the time by getting out their wood.

Miss Kathleen Newton of Lacombe spent a few days here last week visiting friends.

Mr. Cameron Fraser spent a few days last week at the home of Mr. George Brown.

Mr. Stanley Sharpe who has been spending a month at his old home here returned to Maple Creek on Monday.

Mr. Leslie Oulton attended the seed fair in Edmonton last week. Mr. Oulton was successful in winning four first prizes on his potatoes. He also won the championship.

Quite a number from here enjoyed a sleighing party last Wednesday night to the home of Mr. and Mrs. L. Melrose, Morningside. A very enjoyable time was spent in games and dancing.

Mr. Bob Eurat, who has been spending the past month at Maple Creek returned here Monday.

Mr. and Mrs. Z. Ogivie entertained a few of their friends last Tuesday evening. A very pleasant time was spent by all present.

The friends of Mr. Frank Riddoch will be pleased to hear that he is on a tour around the world.

A number of the folks from Fairview held a sleighing party to the home of Mr. and Mrs. W. Chessor, on Tuesday evening. A very nice time was spent in music and games.

Death of Jno. Fraser

Mr. John Fraser, a highly respected farmer of this district, died on Tuesday last, following an operation, and the funeral is being held this afternoon, services being conducted in the United Church. Deceased has been a resident of Lacombe district for many years, and has a host of friends throughout Central Alberta, who learned of his demise with much regret. He was in his 66th year.

Besides his wife, he leaves one sister, Mrs. J. T. Packer; three brothers, Jesse, Elmo and Cameron, all of Lacombe.

A NEW CHEVROLET SIX

*MADE TO ORDER FOR CANADIANS

with Fisher **NO-DRAFT** *Ventilation System*

For months, Chevrolet and General Motors asked automobile owners—"What do you want in your next car?" For months, our engineers planned, improved and tested—with the results of this Canada-wide survey to guide them. Today, we invite you to get full details of the new 1933 Chevrolet Six—Made to Order for Canadians—styled, powered and priced to be first choice among low-priced cars!

It's the most exciting Six in Chevrolet history—with the most revolutionary development since the closed body—Fisher NO-DRAFT Ventilation, individually controlled.

What Other NEW FEATURES?

New "Air-Stream" Styling . . . Anti-Splash Fenders . . . Larger, Lower Fisher Bodies . . . More Horsepower . . . Cushion-Balanced 6-cylinder Engine . . . Shatter-proof Windshield . . . Silent Second Syncro-Mesh . . . "Starterator" Simplified Starting . . . New Octane Selector . . . Even Greater Economy.

Burns' Night at Spruceville

A large and enthusiastic crowd gathered at Spruceville Hall on Wednesday, Jan. 25th, to commemorate the anniversary of Robert Burns, the immortal Scottish Bard. A most enjoyable evening was prepared by the Burns Club and despite the extremely cold night and the scarcity of money, the Club was well repaid for their efforts. The evening started off with a most bountiful supper which was prepared by the ladies of the club, and judging by the satisfied look on the faces of many of the diners, the ladies of Spruceville are sure due for a lot of credit for their excellence in cooking. The concert that followed the supper was all that could be desired, and the various artists on the programme received the highest praise. Jim Darroch acted as chairman of the Concert and conducted the programme very ably. A dance followed the concert, music for which was supplied by the Star Orchestra, assisted in the special dances by Charlie Duthie, on the pipes. Bob Gibson was floor manager for the dance. Everyone present enjoyed themselves immensely, and went home feeling that they had spent a real "nicht wi' Burns."

1 Pipes Selected Mr. Chas. Duthie
2 Song "Star O' Robbie Burns Mrs. Turnbull
3 Comic Song "The Egg" Mr. R. Rhind

THE EX-CLERIC FOUND GUILTY

J. J. Maloney, of whom The Western Globe has referred to on occasion, was found guilty on charges of conspiracy to commit theft, and theft, when he came before Judge Ives, at Edmonton on Monday. On the first count he was fined $100, with alternative of two months in jail and was sentenced to one hour in jail; on the theft charge he was given one year, on suspended sentence. McKenzie and Bassett, also charged with the same offences, were given suspended sentences. Addressing McKenzie and Bassett His Honor remarked:

"I might say that you are the poorest liars in the witness box I have ever seen. You were dodging and quibbing so that even a child could see it. Whether it was from your association with the K.K.K. or not I do not know. This whole case makes me think of boys of a certain age who decide to go out in the woods and play Indians."

McKenzie, who is one of the head workers in the Klan "Morality" squad, it was brought out in evidence, has served several jail terms on crimes of theft and arson, in Toronto and Winnipeg. Then he came west to fix up the morals of the residents of Alberta.

As Mr. Maloney once remarked to the editor of The Western Globe: "He who laughs last, laughs best."

TENDERS FOR WOOD

Sealed Tenders will be received up to February 5th for 8 ricks of green poplar wood, 14 in. in length and at least 4 in. in diameter, to be split, delivered and piled at Central school before March 1st. W. M. Flewelling, Secretary.

NOTICE

Will whoever has in their possession at the present time the book, "I'm Alone" by Capt. Randall, (belonging to Mrs. Chapman) be so kind as to leave it either at the Globe office or at the Rectory.

Rev. T. H. Chapman

On Saturday, February 11th, the Women's Missionary Society will hold a tea on the balcony of A. M. Campbell's Store.

WANTED

Electric Lighting Plant 1250 Watt preferred. State price and full particulars. Leslie Grose, Clive.

WORLD HAPPENINGS BRIEFLY TOLD

The Free State Department of Education estimates it will take 20 years to make the Free State bilingual to the same extent as Canada.

A Royal Canadian Mounted Police training station is to be established in Halifax. About 25 men a month will be graduated at Wellington barracks.

The hottest day in two summers was recorded at Buenos Aires, when the temperature reached 101.5 degrees Fahrenheit on December 31. One case of sunstroke occurred.

The ending of Soviet Russia's first five-year plan and the beginning of the second plan has been accla.med at Moscow, Russia, by the Soviet press.

The Ontario Government has placed a herd of elk on a 385-acre reserve near Petawawa, with the intention of ultimately stocking the forests with them.

Dr. W. W. Yen, head of the Chinese delegation to the League of Nations during the past year, was appointed ambassador to Russia by the Nationalist government.

Another of the problems that bother blind folk has been solved. The first cheque ever written in "Braille" has been cashed by the Bank of Manhattan Company at New York.

A collection of portraits of members of all the royal families of Europe is to be left to the British Museum. It has been compiled by Mrs. Thomas Brooklehank, now more than 80 years old.

A bronze bust of Bliss Carman, the poet, whose ashes lie in Forest Hill cemetery in Fredericton, has arrived from British Columbia and will be placed in the library of the University of New Brunswick.

England's Poet Laureate

John Masefield Once Worked In United States Factory

If conditions in a certain American rug factory hadn't been "unpleasant" John Masefield might today be a New York physician instead of poet laureat of England.

With a far-away look in his wistful gray eyes, Masefield sat before a huge stone fireplace in the home of Mrs. Thomas Lamont, New York, and discussed the two years he spent as a factory hand and saloon employee in the United States.

He and Mrs. Masefield had just arrived from England.

He told how as a boy of 17 he came to America and worked in a Greenwich village saloon for $10 a month and board; how a friend of the bartender (whom he hoped to see) got him a job in a Yonkers (N. Y.) rug factory at $1.05 a day, and how after nearly two years he was getting $8.50 a week.

"Until then I had had only one great ambition," Masefield continued, still in his hurried, serious manner, "and that was to get a sword and cut off my nurse's head.

"But while working in the factory I decided I would become a doctor. I grew interested in the part flies played in transporting diseases. I read a lot about sleeping sickness.

'But I couldn't stand my surroundings, and so I fled back to England. Just before I started I came across a book of Chaucer's poems, and that's what led to my becoming a poet."

Medical Care For Settlers

Saskatchewan Making Provision For Residents Of Northern Areas

Provision is being now made for medical care and hospitalization of 20,000 persons who migrated from the southern section of Saskatchewan to new settlement areas in the north in 1931 and 1932, according to Hon. F. D. Munroe, Minister of Public Health.

Red Cross outposts and other hospitals and doctors of the northern areas are co-operating in the work. Field men of the department of natural resources, said Dr. Munroe, are in charge in the new settlement areas and are responsible for reporting cases where medical aid is needed.

An additional payment of 25 cents per patient per day for patients from the 1932 drought area in hospitals in the province will be made by the provincial government from Jan. 1 on, according to Hon. F. D. Munroe, Minister of Public Health.

This will make the total hospitalization relief payments by the provincial government amount to 75 cents per patient per day.

In making this announcement, Dr. Munroe amplified on the announcement that travelling expenses to doctors in the 1932 drought area would be allowed to a total of $50 a month

Finds Cannibal Snail

E. A. Marchant of Wanganui has discovered a giant "cannibal" snail in the mountains of the North Island of New Zealand. Marchant placed four of them in a box with some fresh vegetation for food, but when he opened the box found that the biggest had eaten the others.

Potash in commercial quantities is being recovered from the Dead Sea.

France produced 892,410,000 gallons of wine in 1926.

Ties Of Empire

Canadian and Australian Regiments Establish Alliance

The ties of Empire continue to be woven around Canada and her sister states of the British Commonwealth. The latest evidence is the precedent created by a battalion association of the old Canadian corps which, adapting the time-honored principle of inter-regimental alliances to veterans' associations, has established an affiliation with the battalion association of a unit of the Australian corps. Announcement is made of the alliance between the 2nd Canadian Infantry Battalion Association and its vis-a-vis in Australia—the 2nd battalion (Australian Imperial Force) association.

The affiliation follows an interchange of letters between the executive officers of the two associations. From the correspondence emerged a suggestion that "the principle of inter-regimental alliances followed by units of the active forces throughout the Empire might be pursued further, so as to embrace those associations representing the war-time battalions of the Canadian and Australian corps."

In both Dominions the suggestion was warmly approved by the veterans concerned, and has now been translated into accomplished fact.

Mansion Went Cheap

Five Shillings Bought Home Of Millionaire Thread Magnate

"Cardell," the house to which the late millionaire thread magnate, W. H. Coats, of Messrs. Coats of Paisley, took his bride and occupied until his death some years thereafter, has been sold by auction at five shillings.

Standing in one and a half acres of ground, the house has been for several years unoccupied, and as there was no reserve the mansion went to the highest bidder—a woman, who made the only bid of the day. General surprise was expressed when her offer was accepted. Whether the bid was made in earnest or in a spirit of jest is not known, but the auctioneer was forced to accept it. The sale was over within a few minutes. The price is said to be unprecedented. The house is situated in a residential district of Paisley, Scotland.

The assessed rent of the house is $450 and the feu duty (perpetual lease at fixed rent) is about $185. Before the house can be occupied it will require extensive repairs. When Mr. Coates died his trustees made several attempts to dispose of the property, but they were unsuccessful.

Holds Musical Spotlight

Accordion Has Become Popular Through Appearance On Stage

First came the ukulele, then the saxophone, and now it's the piano accordion, and Percy Guest, Detroit merchant, doesn't know what will hold the musical spotlight next.

The accordion craze, according to Guest, came with the introduction of the instrument in musical comedies by such stars as Phil Baker, and the appearance of the instrument in the larger dance bands. The public took it up, Guest believes, because of the fact that anyone who can play the piano can easily transfer his ability to the piano accordion.

The accordion cannot be sold over the counter like most other instruments, according to Guest. Many companies have large display rooms for the instruments, whose weight ranges between 17 and 20 pounds, and may have a keyboard as long as two and one-half octaves.

The modest piano accordion may be purchased for as little as $30, but if the buyer wants a fancy one, highly nickelled and displaying lots of mother of pearl, he will pay in the neighborhood of $500.

Eyes and Nervous Strain

Trying To See In Bad Light Causes Waste Of Energy

Your whole body wastes energy when your eyes are strained by trying to see in bad light, reported Doctor M. Luckless and Frank Moss at a session of the American Association for the advancement of science. Nervous muscular tension of a man reading a book increases or decreases in direct proportion to the amount of light falling on the book.

A possible aid to study of cancer, discovery of the organism that apparently plays a leading part in producing cancer in plants was described by Dr. Michael Levine, of Montegiore Hospital, New York.

The organism he has isolated seems to be what causes cells of a plant to multiply rapidly and produce a tumor. Human cancer results from a similar abnormally fast growth of cells, but the organism that causes it is not known.

Study of how the organism works, said Dr. Levine, may throw some light on the cancer problem in general.

More than 19,925,000,000 cigarettes were made in China in the first half of 1932.

"Yes, I've hunted all over Europe." Really. What had you lost?"

Belfast, Ireland, has a campaign to reduce school study programmes.

THE PRINCE PURCHASES SPEEDIER CRAFT FOR HIS JAUNTS

Our picture shows the Prince of Wales in the usual informal dress in which he makes his flights, while in the background is a photo of the new "Foxmouth" he has purchased for his private use. The machine is fitted with a 130 h.p. Gipsy Major engine, has a continuous cruising speed of 110 miles an hour. It is a similar type of machine to that which won the King's Cup Race around Britain last July. Painted in royal blue and dark red, colours of the Household Brigade, the machine is reported to be the acme of perfection.

Ruin and Despair

Object Lesson To Those Who See No Hope In the Future

The Golden Book Magazine for September gives us a few quotations that should be a lesson to those who insist upon sitting on the top rail of the pasture fence watching for the end of the world.

"There is scarcely anything around us but ruin and despair" said William Pitt in 1795.

"I dare not marry the future is so dark and unsettled," remarked Samuel Wilberforce who inhabited this Earth between the years 1806 and 1873.

"In Industry and Commerce and Agriculture there is no hope," said Disraeli in 1849, while the Duke of Wellington in 1851 thanked God that he was to be spared from seeing the consumption of ruin that was gathering around.

We thank the G. B. M. for digging these statements up. Now we can laugh when John Doe, 1933, insists that there never was and never can be again such a depression. Things are going to the eternal bow-wows, and so on, etc. or what have you."

SCHOOL WEAR THAT IS CHIC AND SO LOVELY WITHOUT A COAT

A lovely sheer woollen in brown tweed mixture because Paris has made it so popular, is chosen by the smart junior for her coat-like dress. The trim is plain orangy-red as are the buttons and belt buckle.

Besides woollen, firmly woven cottons, rayon novelties and linen can be used for this darling school dress.

And it needs no telling how simple it is to fashion it. The small cost is really amazing.

Style No. 989 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2½ yards of 39-inch material with ½ yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Barclay)

LEMON MINCEMEAT

4 lemons.
2 apples.
1 pound currants.
½ cup raisins.
½ cup chopped nuts.
½ cup melted butter.
2 cups sugar.
1 teaspoon salt.
1 teaspoon ground cinnamon.
1 teaspoon ground nutmeg.
1 teaspoon ground cloves.
1 teaspoon ground ginger.
1 teaspoon ground allspice.

Squeeze juice from lemons and cook peel until soft. Put through meat-chopper and then rub through a sieve. Add chopped apples and remaining ingredients, mix well and store in jars. Use as a filling for turnovers and pies.

SHREDDED WHEAT CREOLE

6 shredded wheat biscuits.
3 cups hot meat stock.
2 tablespoons bacon fat.
2 tablespoons minced onion.
2 eggs.
Salt and pepper.
2 tablespoons tomato catsup.
2 tablespoons minced green pepper.

Crumble shredded wheat biscuit and cook until thick in boiling meat stock. Mix with bacon fat, onion, pepper, beaten egg yolks, seasoning, and catsup. Fold in stiffly beaten egg whites. Turn into a buttered baking dish and bake (30 minutes) in a moderate oven (375 degrees Fahrenheit). Serve hot with grilled tomatoes, 6 portions.

Perfect Book Is Short

Opinion Given By Prince George In Address At London

Prince George functioned as a book-critic for a few moments when he addressed the Incorporated Society of Authors, Playwrights, and Composers at London recently, and formulated his ideal of the perfect book.

"I think," he said, "most people feel that books should be short. Most of us have only odd moments to read, and we want information or entertainment in a form that we can grip as quickly as possible."

China expects a construction boom.

Tax Refunds

U.S. Government Refunds Huge Amounts On Income Tax

That very pleasant feeling you get when you find you have been overcharged and get some of your money back has come to thousands of individuals and business houses.

The United States government refunded $80,583,564 last year, all because taxpayers, through some error, paid too much money in that or in previous years.

Several refunds amounted to more than $1,000,000. The United Fruit Company of Boston got $2,950,000, the largest. The sum of $2,188,000 was returned to the Lehigh and Wilkes Barre Coal Company of Pennsylvania.

Douglas Fairbanks, movie star, had $2,186 returned, and Roman Novarro got back $7,604.

Measure Nature's "Jitters"

Scientists Learn How Water Makes Steam, Or Coal Heat

Measuring old Mother Nature's "jitters," a trillion times worse than the worst stage fright, is science's latest way of learning how water makes steam, or coal makes heat.

It's done by measuring the energy in a single "jitter" or vibration of a molecule, which was described before the American Association for the Advancement of Science. If the jitters get strong enough, the molecule's atoms will fly apart and combine again in a different formation, which is what happens when fuel burns or liquid turns into a gas.

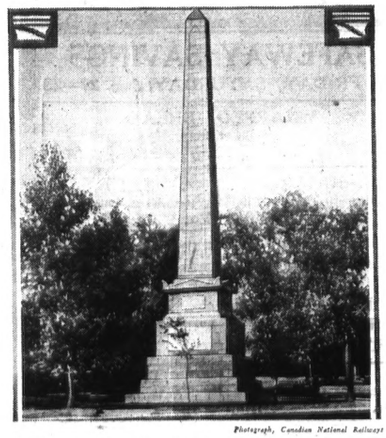

Unusual Law Suits

Judge In Scotland Puzzled Over Case About Bees

Because a swarm of bees alighted on the land of Henry Gow, of Dunfermline, Scotland, Peter Coutts has twice sued Gow. The first time he asked Coutts for the value of the bees. At the end of the honey season he demanded the price of honey which he said he would have had if Gow had sent the buzzers home. Gow claims that in their first season in a new home bees do not produce honey so that he really is out the cost of feeding them. The puzzled judge postponed the case to thinks it over.

English bellringers held a convention in London recently.

+ Do You Know? +

Photograph, Canadian National Railways

THAT what is believed to be the only monument in the world erected to the memory of the commanders of opposing armies is the Wolfe-Montcalm Monument to General Wolfe, the victor, and General Montcalm, the vanquished, commanders respectively of the British and French armies in the decisive battle of the Plains of Abraham? The inscription on the monument reads: "Their valor gave them the same death, history the same fame and posterity the same monument." It is located in Quebec City.

Strong Annual Statement by Royal Bank of Canada

Total Assets Stand at $765,512,920—Of This Amount Liquid Assets are $355,929,912, Equal to 52.86% of Liabilities to the Public—Included Therein Are Cash Holdings of $164,630,724, Being Over 24% of Public Liabilities—Savings Deposits Well Maintained.

The annual statement just issued to shareholders of The Royal Bank of Canada supplies further striking evidence of the satisfactory manner in which leading Canadian financial institutions have passed through the unsettled conditions of the past year. Every part of the statement reflects the strength of the bank's position. Curtailed industrial and trading activity is reflected in lower commercial loans, and an increase in liquid assets. The latter show a marked increase over the previous year, and are now equal to 52.86% of its liabilities to the public. Included in them are cash holdings which alone aggregate over 24% of public liabilities. Savings deposits have been well maintained, particularly in face of the large Government plans put out during the year. Earnings, due to lessened business activity throughout the country, show a slight recession, but were amply sufficient to cover dividends and the usual appropriations.

Strong Liquid Position

The statement, which is for the financial year ended November 30th, shows total assets of $765,512,920. Of this amount, liquid assets, amount to the large sum of $355,929,915, equal to 52.86% of all liabilities to the public. Cash holdings, aggregating $164,630,724 and forming one of the striking features of the report, represent over 24% of liabilities to the public.

Dominion and Provincial Government securities are $89,448,844, compared with $85,473,058 at the end of the previous year, and Canadian municipal securities and British, foreign and colonial public securities $26,750,444, up from $24,641,816.

The various loan accounts reflect current business conditions, and are down substantially from the previous year. Commercial loans now stand at $360,562,286, against $419,345,043, while call loans in Canada have been reduced to $28,951,263 from $39,137,268, and call loans elsewhere to $36,406,742 from $37,156,111. Reduced import and export trade account for the reduction in Letters of Credit to $20,092,951 from $28,966,506.

Deposits at Satisfactory Level.

Deposits have been well maintained. Total deposits at $619,084,143 show a reduction for the year of less than 7%, from $664,795,718. Savings deposits make a very gratifying showing, and at $468,391,153 are down less than $5,000,000. In view of the large Government loans floated during the year, the total would indicate a tendency among depositors to keep ample cash balances and to add steadily to their savings. Non-interest deposits, which in the main are the working balances of business and farming customers, reflect the curtailment of trade activity and lower prices, ebbing down to $128,983,165 from $170,913,903.

Shareholders will be interested in seeing that the reduction in loan accounts has more than offset the reduction in commercial deposits. At the same time, the strong liquid position means that just as soon as trade recovers the bank is in a position to take care of the increased requirements of its customers.

Earnings have held up well, especially in view of the lessened business activity and the lower interest rates at reserve centres. Profits for the year were $4,861,849, compared with $5,448,327. They fully covered dividend requirements of $3,850,000; contribution to Officers' Pension Fund $200,000; appropriation for bank premises $200,000 and reserve for Dominion Government taxes $600,000.

For a number of years the bank has carried an unusually large amount in undivided profits. This year the Directors have authorized a transfer of $5,000,000 of this amount to investment depreciation reserve. This will be regarded as a conservative move, strengthening as it does the inner reserves of the bank to this extent and leaving $1,166,954 to be carried forward to credit of Profit and Loss Account.

Growing Food Conscious

Calories and Vitamines Now Enter Into Calculation Of the Housewife

During the past few years this nation has been growing more and more food conscious. Women with market baskets on their arms, who never thought of such things as calories or vitamins, are now using care to see that they secure foods that will enable them to serve balanced meals.

Vitamin "C" is something that causes grave concern particularly among women who have growing children and who realize that this new-found constituent is very essential.

Really, there is no particular need to worry about the lack of this vitamin, provided children like the fruits or vegetables in which it is found.

Orange slices cut in half, alternated with wedge-shape apple pieces and served on shredded lettuce with any desired dressing makes a simple and economical salad combination that will provide vitamin "C" in unlooked but delicious form. The same orange slices alternated with banana fingers, served on a bed of watercress, or served sandwich fashion with a slice of Bermuda onion between, will also supply this vitamin. In fact, any orange fruit cup or salad is rich in vitamin "C."

Patronized By Royalty

Woman Printer In London Held a Royal Warrant

Believed to be the only woman printer in the country to hold a Royal Warrant, Miss Marion Clarke, who combined printing with a toy and model-boat shop in Bath Road, Cowes, has died, aged 61 Miss Clarke, when a girl, was apprenticed to a local printer and afterward began business on her own account, setting up type and having a small printing press in the corner of her shop with which she did private printing for Queen Victoria when the court was at Osborne. A Royal Warrant as printer to Her Majesty at Cowes was given in 1900.—London Daily Telegraph.

Money For Hospitals

More than $25,000 has been raised for Welsh and English hospitals as a result of the exhibition of Princess Elizabeth's miniature house which was built and presented by the people of Wales. According to an official statement just issued in Cardiff, all but $2,625, which was given to Bristol charities, has been distributed among Welsh hospitals. More than 250,000 people paid to see the house.

Idea Did Not Work

Stewards on the "Empress of Britain" had arranged to get George Bernard Shaw's signature to sell to autograph seekers. When one purchases drinks in the Cathay lounge one signs a bill. The stewards intended to pay for the drinks themselves and keep the bill until they discovered Shaw was a teetotaler.

The common garden mole has eyes, but they are very small and sunken almost beneath the skin.

More than 1,110,000,000 national savings certificates have been sold in Britain.

A Remarkable Achievement

Great Improvement Is Shown In Producing Bacon Type Of Hogs

A statement recently issued by the Sheep and Swine Division of the Dominion Department of Agriculture with respect to Canada's bacon hog industry observes:

"When the complete hog grading statistics for the year 1932 are added up, it will be found that from our total hog marketings of the year over 2,500,000 market hogs sold for slaughter under the Hog Grading Regulations throughout the Dominion will have graded as either select bacon or bacon. The above figures show a remarkable achievement for the hog raisers of the Dominion. It means that Canada, in a period of a little over ten years, has revamped her swine industry, creating as the backbone of the industry an ample supply of breeding stock of select bacon type with feeding and productive qualities which place our best hog raisers in the front rank of type, quality and economic production."

Club Work Effective

Points Which Should Receive Special Attention In Connection With Boys' and Girls' Swine Clubs

Five points which receive special attention in connection with Boys and Girls' Swine Club work in the carrying out of which the federal and provincial Departments of Agriculture co-operate are detailed as follows:

1. The location and distribution to club members of young pigs of good bacon type and breeding. Of these, many of the best females are kept over for breeding purposes.
2. The giving of practical instruction to club members at their homes or through lectures at club meetings.
3. The distribution of printed or mimeographed information regarding the breeding, feeding, management, judging and marketing of swine.
4. The arrangement and conduct of judging and other forms of demonstrations.
5. The securing of good bacon type boars for club districts.

Business For Coast Province

B.C Likely To Increase Apple and Lumber Exports To Britain

British Columbia should reap important benefits from the new trade agreement between Canada and Germany. Provincial plants should obtain a share of the $1,000,000 increased market for wood pulp with Germany and the B.C. apple market should be considerably enlarged.

British Columbia may increase her lumber exports to the United Kingdom during the coming year to 152,000,000 feet. This compares with 87,000,000 feet shipped during the past year, a gain of more than 70 per cent. or treble that shipped in 1931, when 50,000,000 feet created a record.

Score For Doctor Koo

Yusuke Matsuoke told the League of Nations that Japan regarded a boycott as worse than a military attack, to which Dr. Wellington Koo replied that if that were true, China would much prefer that Japan boycott her goods than invade her country with arms. And, as we see it, the doc won that one.

HEART OF THE NORTH

By

WILLIAM BYRON MOWERY

(WNU Service)

Copyright by William Byron Mowery

CHAPTER IV.—Continued.

She checked the plea. She could not bring herself to put Alan in so fearful a dilemma. Looking up, she met his gaze squarely again. "No, I can't ask that of you. I'd never ask that."

He chose his words very carefully. "The question with me, Joyce, is this: How deeply is your father involved? I can't think he'd go the whole length with these bandits. I can't think he'd countenance murder or even so brazen a robbery as these men staged. Perhaps they deluded him about their intentions. If they're caught, they're going to lie and throw as much of the blame on him as they can. But if I can have the truth as a working basis, I can nail their lies. We can't hope to save him from a penalty, but we maybe can save him from the—the worst."

Joyce blanched at the last word, at the spectre it aroused. Her father stood charged with murder. In her heart the Law suddenly became a tangible and fearsome thing.

Alan went on: "You stand a better chance of getting the truth from him than I do, Joyce. He'd suspect me if I tried to talk to him. But with you he'd be more frank and open. When he comes in, won't you try to find out what you can?"

"You mean I'm to watch him and gather what hints I can, and perhaps ask questions that seem innocent?"

"That's exactly it, Joyce. Exactly what I meant. If you'll do that for me, if you'll help me that much . . . Joyce, don't you see why I told you this? Don't you see it's because I'm going to stick with you? I won't see your dad railroaded. I'll help him to the limit I can—because he's your father."

He was facing her in the ghostly morning light. Again he was conscious that his four months of absence, breaking the friendship between them, had invested her with an aura of strangeness to him; and that all during this brief fateful visit he had become aware of her in a quickened sense. How brave and comradely a girl! And in spite of her hard life here, in spite of her efforts to be a good bush-loper, how winsome and girlish and adorable she was!

Unwilling to detain him, Joyce offered him her hand, wishing him success today, hiding her fears for him when he should come up with these men. Alan bent nearer to her, he bent down a little to kiss her, as more than once he had done in the years past. It was an impulsive act; he was swept by admiration of her bravery, of her girlish prettiness. And it was a humble act of contrition, too, and self-reproach; for he had said to himself that if he had kept up his visits here, instead of leaving Joyce all alone to the battle, he might have halted Dave MacMillan's plunge into crime.

She went with him down to the wharf and stood watching the patrol embark. At the first bend above, he turned to look back. Vaguely through the mist he saw Joyce still standing on the wharf in the gray chill of earliest morning. He waved to her and caught the tiny white of her kerchief answering.

When the mist had hidden her from him, he turned his eyes ahead. Somewhere on up the spruce-buried Alooska were those six bandit strangers, rifle-armed and desperate and certain to give battle. Against them he was pitting his life and the lives of his men today.

* * * * * * *

Fifty miles above the MacMillan trading store, Alan ordered Pedneault to swerve in toward the north bank and stop.

He believed those bandits could not be very far ahead now Across this silent wilderness the roar of the launch's engine carried for five or six miles. Warned of pursuit, those criminals might lift their canoes back into the timber and let the police go harmlessly past. Likelier still, they might lay an ambush where the river was narrow, and open on the launch with repeating rifles at a murderous point-blank range. But if he located them on up-stream, he could slip upon them quietly in the paddle craft and lay a deadly ambush himself.

Taking a pair of binoculars he splashed ashore and hurried up a hill to its summit. There he had a clear view of a long river "straight" reaching twenty miles up-stream.

He moved his glasses slowly up-stream, praying for a glimpse of those two outlaw canoes. Carefully focusing, he scrutinized the river, the banks on either side with their little curves and hollows; and searched above the trees for a wisp of camp smoke. Nothing, nothing whatsoever, of two creeping black dots. The bandits were twenty miles ahead at least.

As he hurried back down to the launch, he began to realize that those two canoes had travelled more swiftly than he had thought possible. For the first time in his police experience Alan found himself ill at ease and uncertain of what he was running into. Though he could understand, on the assumption of Dave MacMillan's guilt, how the bandits knew just the right moves to make in this dimly known country, still he was utterly unable to explain how six absolute strangers could get into this country unseen. Who they were, where they had come from, how they had got in here unknown to everybody—the whole thing was uncanny. He hardly knew what to expect of them next.

Splashing back upon the launch, he told his men tersely: "They're not in sight yet, and I could see for twenty mile. We've got to meet up with them before they reach the Forks. They're making tracks, Ped, you've light to drive by now. We'll take our chances."

Twice more that morning, between Pedneault's reckless dashes, he hurried ashore and futilely searched ahead. Something had gone wrong. The patrol should be within sight of them. Estimating their speed and the speed of the pursuing launch, he knew the police craft should have overtaken them about eighty miles above the MacMillan trading post. He had come a hundred and twenty, and no sight of them yet. They had either dodged aside, or had done something to give them a big edge over what he thought possible.

It was afterwards when the waters of the Alooska had given up their ghastly secret, that Joyce MacMillan listened to the accounts of several Yellowknife men and gazed upon certain grim evidence, and placed together the story of how these bandits were able to keep in the lead. But Alan knew nothing of that harrowing story now; he knew only that something had upset all his calculations.

Fifteen miles from the Alooska Forks he went ashore a last time and climbed a squat tree. He had a clear view to the Forks. The glasses picked up a sight that set his heart pounding madly against his ribs.

Far ahead, three short miles from the Forks of the Alooska, a pair of tiny black objects, like bugs crawling along a silver ribbon.

He jumped out of the tree, leaped down the slope.

Splashing aboard, he flung all caution to the winds. "Throw into it, Pedneault! We've got to beat them to the Forks. We'll close in on them in the launch. Got to! They'll hear us but they won't stop, won't fight, if they can make it there. Open her up! To h—l with rocks and mud bars now!"

His last words were drowned in the engine's roar as Pedneault opened out the launch. With the wind stinging his eyes and the spray lashing him, Alan clutched the painter to keep from being flung bodily overboard, and gave Pedneault what help he could.

The craft careened around the last bend, a scant mile from the great Y of the Alooska. A clear open stretch lay in front. Dashing the blinding spray from his eyes, Alan rose precariously to his feet, looked ahead; and his heart sank as the truth was borne in upon him.

Those canoes had beaten him to the Forks.

It was maddening, his defeat — doubly maddening for its closeness to a smashing triumph. He had come within five minutes of overhauling them in the launch, and then had missed, had missed by a mile that loomed gigantic as two hundred. They had beaten him. They had heard the thundering boat, had flung their whole strength into the race; and now were whipping on eastward along one or other of the Alooska branches.

The launch would have to be abandoned at the Forks. He knew the police boat would be stranded or wrecked within half a mile if it attempted to go up either of those shallow streams. He would have to take to paddle canoes and split his party.

Unbeaten, he planned swiftly. The chances were ten to one that the bandits had darted up the left branch leading northeast into the Thal-Azah. He decided quickly: "I'll follow that left branch. I'll take Bill with me, he's a red-haired devil in a fight, he's our best shot, he'l be dependable in whatever comes. But the third man—Ped or Larry?" Both splendid men, both experienced veterans of many a patrol.

He made up his mind: "I'll send Ped up the right branch with Murgoon and Whipple. Bill and Larry and I'll short up the left. We'll be the ones to do the business."

As the great Y of the Alooska loomed up, he turned and gestured to Hardsock and Larry. Silently understanding, they crept back to the stern deck, unlashed the canoes and had them ready by the time Pedneault, slowing down the launch, steered it in between two little willow islands at the Forks and stopped.

Alan ordered him: "Ped, take these two men and whip up the south branch. Larry and Bill and I'll cover the north. If you sight them, don't pitch into that pack. You'd be fighting six men single-handed. If they did happen to go that way, you drop back here to the Forks and wait for us. We'll be able to track them in that timber country. Let's pile off. They can't be over a mile and a half away."

Bill snarled: "H—l's blue blazes, Alan!—let's stick together. Us splitting this up like this, it's the d—dest fool trick I ever heard of!"

"Shut-up!" Alan snapped. "Generals orders, not mine. Every d—d thing you say or do will be tattled to him." He tossed the launch anchor into the mud. "I said pile out. Let's be moving." He stepped down into a canoe, stood rifle between his knees, caught up a paddle.

Cursing beneath their breath, Bill and Larry clambered in with him.

The two canoes separated.

(To Be Continued.)

Boon To the Blind

Inventor Working On Idea For Books That Talk

Books that talk for the blind are not beyond the ream of possibility, according to Glenn E. Watson, Detroit inventor.

Watson, who demonstrated radio typewriting two years ago, is developing a plan whereby the light waves from a page of printing may be translated into radio waves for transmission into sound.

The plan, he said, could be worked out something like movie film carries talkie reproduction powers.

Pointing to the benefits of his plan, once it is developed, the inventor said a blind man has little choice in his reading.

"Everything he reads," Watson said, "is censored by the publisher of Braille books. He can't read the newspapers. He has to go to a library for Braille books every time he wants to read."

The inventor has completed a rough model of his talking book.

Discover New Star

Has Been Sought By Astronomers For 312 Years

Out in space a gigantic pin wheel of two balls of fire as big as 24 suns has been discovered. It is whirling at the rate of about 34,000,000 miles an hour in a space only about as wide as a fifth of the distance between sun and earth.

The results of 312 years' observations which have proved the existence of this fireworks monster were reported to the American Association for the Advancement of Science by Prof. Raymond E. Dugan, of Princeton University.

The pin wheel is the star 8X Cassiopiae, so distant that even in a telescope it is just a pin point of light to a man's eyes. This star is really twins, one whirling about the other, one sixteen times the sun's diameter, and the other eight times.

Taking No Chances

He was very hungry, so he pushed open the swing doors of the restaurant and entered. It was a rough, ill-smelling place, but he thought he would try a cup of coffee and something to eat. The waitress brought coffee in a thick, heavy cup. "Where's the saucer?" inquired our fastidious friend. "We don't give no saucers here," replied the girl. "If we did, some ill-bred ignoramus would drink out of his saucer, and we'd lose a lot of our swellest customers."

Large Order For Lumber

An order for 15,000,000 feet board measure of sawn lumber to be shipped in 1933 has been received by a large lumber firm whose headquarters are in Quebec City, from a firm in London, England. This order will provide work for an additional 500 men.

It has been learned unofficially that the Japanese government has communicated to the Soviet Government a formal refusal to sign a non-aggression pact with Soviet Russia proposed by this government a year ago.

HER FAT WAS A BURDEN

Now She Is Quite Slender

Here is another case where the trim slim figure of youth has displaced the coarse, fat outline of middle-age. It is a housekeeper writing. She says:—"I cannot say what weight I was, but I was very fat—a burden to myself. I have taken three bottles of Kruschen Salts and now I am quite slender. I am 56 turned and people take me for 40. I am more than proud of myself. You can take it from me that every word of this is true. I took a teaspoonful in hot water every morning till I used three bottles. Now I only take half a teaspoonful each morning. I cannot recommend the Kruschen Salts enough, for they are worth their weight in gold."—(Mrs.) A. H.

For generations, wealthy overweight people have been visiting those European Spas whose waters are recognized for their reducing effect. It is called "taking the cure." Now the formula of Kruschen represents the ingredient salts of the mineral waters from those far-famed Spas. These Salts combat the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

Great Slave Lake

Second Largest Lake Lying Entirely In Canadian Territory

Lying in the district of Mackenzie in the North West Territories is Great Slave Lake with an area of 11,170 square miles. It is the second largest lake lying wholly within Canadian territory, being exceeded in size only by Great Bear Lake. It is on the great northern inland waterways system which extends to the Arctic Ocean. Mackenzie River which flows out of Great Slave Lake has a length to its headwaters of over 2,509 miles and is ranked with the great rivers of the world. It is navigable for a great part of this distance with only one break at the rapids on Slave River at Fort Smith. The elevation of Great Slave Lake is 480 feet above sea level and the Mackenzie River in its course to the Arctic has a fall of that amount, this fall being in the main fairly uniform. The Topographical Survey, Department of the Interior, Ottawa, has just issued a reprint of the map of the eastern end of Great Slave Lake and including the Northern arm. This arm of the lake is largely full of islands and peninsulas and extends to the site of Fort Reliance at the mouth of Lockhart River. Several navigation channels are in use and these are shown. This map is one of a series showing the Mackenzie River Navigation channels. They are printed on scales of four and six miles to one inch and include the water route from Fort Smith to the Arctic besides several other localities not on the direct navigation route. A list of the maps available and their prices may be obtained from the Department of the Interior, Ottawa.

Hobby Proves Valuable

Ottawa Airman Makes Living Out Of Talent For Whittling

Things looked bad a few months ago for A. B. Abolit of 22 Bower Street, Ottawa, but he has whittled his way out of the depression. Discharged from the Royal Canadian Air Force when the government cut staffs, he was left without resources and with an expensive house he had built himself.

He had a hobby, whittling. Ever since he was a boy in Pictou, N.S., he had whittled little wooden statuettes just for the fun of it. He started whittling in earnest, making caricatures of human types on Canada's Atlantic Coast, images of Indians, getting the costumes right by studying specimens in the National Museum of Canada at Ottawa, and model totem poles.

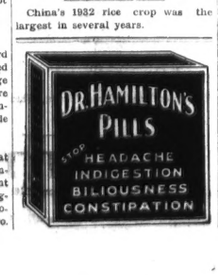

The things sold well in Canada and in the United States. Abolit wonders if he couldn't find one or two other whittlers who would join him in forming a small whittling industry. He can't fill all his orders himself, he said.

Science Scores Again

Success in causing kidneys to grow artificially on a glass slide under a microscope and a significant medical discovery resulting from watching the "wheels" of this "living machine" were reported to the American Association for the Advancement of Science at Atlantic City.

One of the most extensive natural basins of the earth is the Hudson Bay basin of Canada with an area of 1,500,000 square miles.

China's 1932 rice crop was the largest in several years.

Revolution Is Possible

U.S. Research Committee On Social Trends Reports Findings

The United States research committee on social trends, after three years study, reported that there "can be no assurance" that "violent revolution" in America can be averted, "unless there can be a more impressive integration of social skills and fusing of social purposes than is revealed by recent trends."

The committee's findings emphasized that the group did not wish "to assume an attitude of alarmist irresponsibility," but added that it would be "highly negligent" to "ignore imminent perils in further advance of our heavy technical machinery over crumbling roads and shaking bridges."

"There are times," the committee reported, "when silence is not neutrality, but assent."

The research was financed by the Rockefeller foundation and more than 300 investigators throughout the United States took part in it. The findings are published in two volumes of 1,568 pages.

President Hoover, who appointed the committee in 1929, says in a foreword:

"It (the report) should serve to help all of us to see where social stresses are occurring and where major efforts should be undertaken to deal with them constructively."

He also points out that the survey is the latest of a series beginning in 1921 with the report on "waste in industry" compiled under his chairmanship.

The report covers a multitude of subjects, from "happiness" to technology, divorce, birth control, graft, bootlegging and international relations.

Near the end of the findings, the committee reports:

"The alternative to constructive social initiative may conceivably be a prolongation of a policy of drift and some readjustment as time goes on. More definite alternatives, however, are urged by dictatorial systems in which the factors of force and violence may loom large. In such cases the basic decisions are frankly imposed by power groups, and violence may subordinate technical intelligence in social advance.

THE RHYMING OPTIMIST

By Alice Michelle

MINUTE BY MINUTE

Minute by minute,
That's how life should go;
Fresh every morning,
All the brave world's show!

Joy with the sunrise
Creeping in at dawn,
Peace when the stars shine.
After day is gone.

Nothing of folly,
Naught of fret or fear,
Courage for keeping
In the now and here!

Leave for tomorrow
All tomorrow holds,
Touch not the curtain
That the future folds.

Minute by minute,
Opening to our eyes
Petal by petal
All the glad world lies!

No Wheat Needed

Latest Information Says Russia Not Importing This Season

Soviet Russia will not be forced to import wheat this season, Col. J. H. Mackie announced at Ottawa, as the opinion of Peter Bogdonov, chairman of the Amtorg Trading Corporation, Russia's commercial organization in New York. Col. Mackie has been prominent in recent years as an intermediary between Canadian and Russian industrialists.

"I discussed Russia's wheat supply with Mr. Bogdonov a few day ago," says Col. Mackie. "He said his latest information was that wheat collections in Russia during the past month were above expectations and that his opinion was Russia would not be forced to import wheat."

Winter Cruise Shortened

88. Vancouver and 88. Skeena Curtail Trip To Save Expense

In the interests of economy the annual winter cruise of H.M.C.S. Skeena and H.M.C.S. Vancouver have been curtailed, says a message received from naval headquarters in Ottawa.

The cruise will be cut short by a month and the ships will not go through the Panama Canal.

They will visit Pacific coast ports as far south as Mazatlan, in Mexico, and will return to their base in Esquimalt during the first week in April. They left the Victoria naval harbor January 6.

Winter Air Travel

Air travel from Germany to Russia for the first time will be continued through the winter, according to a recent announcement by the German Russian Air Transportation Company. Effective December 15, the Berlin-Moscow service is being operated daily for the carriage of passengers mail and freight.

Steel products in Britain expect an early business improvement.

Get Rid of That

SORE THROAT!

Any little soreness in the throat grows rapidly worse if neglected. Crush some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to throw off your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.

ASPIRIN

TRADE-MARK REG. IN CANADA

BAYER

The Living Room Test

Furnishings Are An Indication Of Family's Social Standing

The living room furniture test of a family's social standing, based on study of more than 1,000 homes of all classes throughout the United States, was worked out by Prof. F. Stuart Chapin of the University of Minnesota.

If a living room contains such items as hardwood floors, large rugs, a central heating plant, library table, book cases and books, table lamp, general newspapers and magazines, piano, radio and telephone, the family to which it belongs is almost certainly an upper class one, he found.

In contrast lower class homes have in the living room softwood floors, small rugs, stoves for heat, few newspapers, no book cases, arm chairs, magazines, piano, or telephone.

Partridges Lack Feed

Hundreds Found Frozen In Manitoba According To Reports

Hungarian partridges, that wonderful little game bird, to be found in large numbers all over the three prairie provinces, are perishing from lack of feed in Manitoba, due to deep snow. Reports coming from Winnipeg indicate that hundreds of birds have been found frozen. They seem to be unable to get enough food, grow emaciated, and then die.

Thousands of the birds are flocking to barnyards and along the railways where feed is to be found. They will not eat rose hawks like the Canadian birds, and do not dig into the snow for protection.

Canada's Fish Production

Saskatchewan and Yukon Kept Up Record In 1931

During 1931 fish production in Canada showed a decrease in every province except in the Yukon and Saskatchewan. On December 20, 1932, there had been an increase in domestic fishing licenses to the extent of 346 over the corresponding period of the previous year. The natural resources department is continuing the work of stocking certain of the more suitable lakes of Saskatchewan with angling species of fish. During the season seven lakes chiefly in the Cypress Hills region, were stocked with trout; 25,435,508 fish and fish fry were distributed during the year.

New Metal Discovered

Feather-Weight Substance May Displace Use Of Aluminum

Scientists believe that in beryllium, a feather-weight metal which is stronger than steel, they have discovered a substance which will displace aluminum in many branches of industry.

Intensive experiments are now being conducted by the Institute of Metals to test its usefulness.

The objection to its general use so far is its brittleness, but experts are hoping to blend it into an alloy which will make its use practicable for all the commercial purposes to which aluminum is now applied.

With One Exception

The London Sunday Pictorial says a sports writer mentions that if a man had set out from London in December, 1932, to walk round the world, he would not return to that city until the end of 1036. Unless, of course, he were a plumber?

About 1,500,000 documents are stamped in government offices in London every day.

French industry is much disturbed over threatened tax increases.

Little Helps For This Week

"Bear ye one another's burdens, and so fulfill the law of Christ." — Galatians 6:2.

There are those who take what they can get,
Then peer around for more;
Who save and stint, and dwell content,
Behind a miser's door.

There are those who give with generous hand,
And seek to give still more;
The sick and sad, the poor and low,
Find welcome at their door.
—Grenville Kleiser.

However perplexed you may at any hour become about some question of truth, one refuge and resource is always at hand; you can do something for someone besides yourself. When your own burden is heaviest you can always lighten a little some other burden. Let this thought then stay with you: there may be times when you cannot find help, but there is no time when you cannot give help. — George S. Merriam.

The Casino of Flowers at Beaulieu-sur-Mer, on the French Riviera, was recently offered for sale at auction.

No more dusting for me!

at least not with old-fashioned dust cloths. I've found a better way.

Thousands of Canadian women know that her "better way" is the Appleford Wonder Paper. Made from clean rags and soft paper pulp scientifically treated with high-grade furniture polish, it dusts — as it cleans — as it polishes.

Wonder Paper is changing the old-established order of house-cleaning. One neat package of it appeals more to women than yards of old rags that spread dust and constantly need washing to be sanitary.

You get twenty-five sheets of Wonder Paper for a quarter. Simply crumple a sheet into a soft wad, go over the furniture, woodwork, and the floors. The results are a delight. In half the time and with half the effort, you get a necessary task done far more satisfactorily.

And when you're through, throw away the piece of Wonder Paper. No shaking out, or washing, of dusters. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous PARA-SANI, the Heavy Waxed Paper in the Green Box. Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, just send this coupon and we'll give you a booklet entitled "Leftovers", containing one hundred recipes, as a bonus.

Appleford Paper Products, Ltd., Hamilton, Ontario.
Enclosed find 25c for which please send me one package of *The Wonder Paper* and your 100 recipes for "Leftovers".

ST. ANDREW'S CHURCH

Pastor:—Rev. R. B. Layton, L. D. Wright, G.U.E.C.C., Mus. Director

Sunday, January 29

11:00 a.m. Morning Service.

7:30 p.m. Evening service; address "The Message of a Japanese to a Christian World."

8:35 p.m. Musical service by the Choir. The twenty-minute program given by the Choir last Sunday evening was greatly enjoyed. Solos by Mrs. T. Wilkes and Mrs. G. P. Johnston are especially worthy of mention. Ask the Choir for your favorites. They will be glad to sing them for you. Also please remember the nickle contribution. It is needed for new music.

At the evening service of February 5th, the senior C.G.I.T. group will present a religious drama.

Bible Discussion group meets every Wednesday evening at 8:00 p.m.

Meeting of Presbytery will be held on March 2nd. W.M.S. Presbyterial meets at the same time.

The date for the Women's International Day of Prayer is set for March 3rd.

A Question Box is being established by the Pastor. Questions must be on Biblical matters, be written out with signature attached and placed on collection plate. On the last Sunday of the month such questions as are suitable will be answered.

RE "CHRISTMAS CHEER"

The following notice has been received from the Synod Office, Calgary:—"Mrs. Payne (Toronto) informed us she was very sorry, but they could do nothing; at least, not until after Christmas, at best."
Rev. T. H. Chapman.

INSTAL OFFICERS

Reports of the year's work were received at the last meeting of the W.M.S. held at the home of Mrs. H. Trimble, and the new officers installed. Mrs. P. MacDonald led the Devotional exercises and several members read the study leaflets. Decision was reachedthat Society is to hold a tea on February 11th, and the Presbyterial Conference on March 2nd. Meeting next month to be at the home of Mrs. C. Danner.

The Lacombe Minstrels are playing at Bentley, Friday, Jan. 27th. Dance after the show. One half proceeds in aid of Bentley Community Hall Fund.

The Annual Meeting of Spring Valley District Hall will be held in the Hall on the afternoon of Thursday, February 2nd, 1933. D. G. Whitney, Sec.-Treas.

The regular meeting of the Ladies' Guild will be held at the home of Mrs. F. E. McLeod on Wednesday, February 1st.

SOURED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile
—No Calomel necessary

Many people who feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy or chewing gum, or roughage which only move the bowels and ignore the liver.

What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Get your stomach and intestines working as they should, once more.

Carter's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. 25c at all druggists. 51

TENDERS FOR WOOD

Sealed tenders will be received up to February 11th, or the delivery of 20 ricks of green poplar wood at the Arbordale School. Wood to be 16 inches in length. Get particulars from Secretary, Mrs. R. Riesterer.

FOR SALE

THE TOWN ACT
Section 222
FORM "I"
Town of Lacombe Municipal Elections, 1933

PUBLIC NOTICE IS HEREBY GIVEN that a meeting of the electors of the Town of Lacombe will be held in the offices of the Secretary-Treasurer on Monday the sixth day of February, 1933, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of nominating candidates for the office of Councillor (3) and for the office of Mayor for the next ensuing two years.

GIVEN UNDER MY HAND at Lacombe, Alberta, this 20th day of January, 1933.

LEWIS P. MINKLER
Returning Officer

J19-2

NOTICE

IN THE MATTER of the Estate of Alexander Swanson, late of the Town of Lacombe, in the Province of Alberta, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Alexander Swanson who died on or about the 11th day of September, are required to file with the undersigned as Solicitor for the Executors of the said deceased by the 16th day of February, A.D. 1933 a full statement duly verified of their claims and of any securities held by them and that after that date the Executors will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed or which have been brought to the knowledge of their Solicitors.

DATED this 3rd day of January, A.D. 1933.
